

FLEXIGAUGE FG40 TPMS

030570

The Flexigauge FG40 TPMS is a compact diagnostic tool for the quick and easy reading, configuration, and maintenance of TPMS sensors in commercial vehicles. When triggered, the sensor is detected in real time and the data are shown on the LCD display—enabling efficient diagnostics in workshops, fleet management, and vehicle manufacturing. An integrated tread-depth gauge also allows a comprehensive assessment of tire condition with a single device. The connectivity option ensures seamless data transfer to the associated TireCheck app.

The Flexigauge TPMS, integrated into TireCheck's tire inspection software, is designed to enable the fastest and most reliable verification of fleet safety.
