TESTIMONIAL

"Paper inspections left us with gaps, errors, and constant firefighting. With TireCheck, every vehicle is inspected, every result is digital, and nothing gets missed.

We've saved time, cut costs, and finally have the visibility to plan maintenance instead of reacting to breakdowns. It's given us control and our customers real confidence in our service."

Managing Director, European Service Provider

CHALLENGE

A European service provider managing a fleet of 350 vehicles was still relying on manual, paper-based tire inspections. Results were written on clipboards and filed away — a process that was slow, inconsistent, and error-prone. Missed vehicles and misplaced paperwork left dangerous gaps in inspection records, putting both compliance and safety at risk. Without reliable data, managers had no clear view of tire health trends, and maintenance teams were left firefighting failures instead of planning ahead. The lack of proactive control led to unplanned breakdowns, rising costs, and no meaningful reporting for customers — increasing frustration and eroding trust in the service provider's reliability.

RESULTS

1

FASTER, MORE EFFICIENT CHECKS

Technicians cut inspection times by up to 40%, saving hours each week across depots.

2

ERROR-FREE, COMPLETE INSPECTIONS

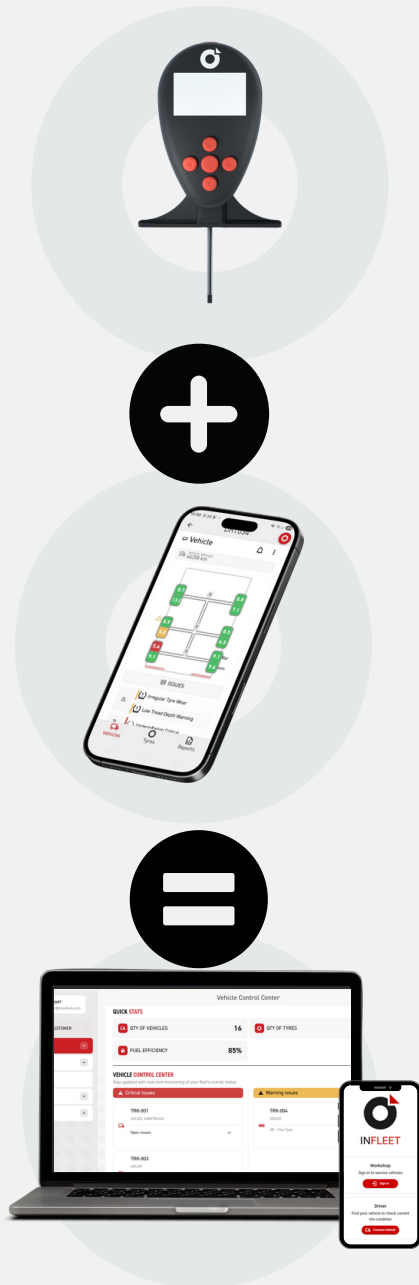

Every vehicle in the 350-strong fleet was digitally inspected with 100% accuracy, eliminating missed vehicles and lost records.

3

GREATER TRANSPARENCY FOR CUSTOMERS

Automated, audit-ready reports improved confidence, strengthened relationships, and turned tyre management into a competitive advantage.

CONNECT • INSPECT • REPORT

WHY IT MATTERS

Unchecked tires cause breakdowns, delays, and lost trust. Manual inspections are too slow and too error-prone, keeping fleets reactive instead of proactive—and stuck in a costly cycle.

TIRE INSPECTIONS

**STOP CHASING PROBLEMS AND START CONTROLLING INSPECTIONS:
FAST, ACCURATE, ACTIONABLE.**

SOLUTION

TireCheck transforms tire inspections from a manual, error-prone task into a fast, digital, and reliable process. Using the rugged FlexiGauge handheld tool, technicians capture tire pressure, tread depth, and temperature in seconds.

Results sync instantly with the INFLEET platform, giving fleets real-time visibility, automated reports, and proactive maintenance notifications. The result: every vehicle inspected, every record captured, zero gaps.

BENEFITS

FASTER CHECKS.

Up to 40% quicker inspections, saving hours every week.

PROACTIVE MAINTENANCE.

Plan repairs before breakdowns, reduce downtime by up to 20%.

REAL TIME ALERTS & REPORTS.

Automated notifications and audit-ready data for customer confidence.

ERROR-FREE INSPECTIONS

Digital records with no missed vehicles or lost paperwork.

**DON'T WAIT FOR ANOTHER BREAKDOWN.
